VOLUME NINETY SEVEN

ADVANCES IN COMPUTERS

SIKKIM UNIVERSITY
Date 06/11/15
ACC. No. 44410
TEESTA INDUS LIBRARY

Edited by

ATIF M. MEMON, Ph.D.
College Park, MD, USA

REFERENCE BOOK

ELSEVIER

AMSTERDAM • BOSTON • HEIDELBERG • LONDON
NEW YORK • OXFORD • PARIS • SAN DIEGO
SAN FRANCISCO • SINGAPORE • SYDNEY • TOKYO
Academic Press is an imprint of Elsevier

CONTENTS

Preface *ix*

1. Comparing Reuse Strategies in Different Development Environments **1**

Julia Varnell-Sarjeant and Anneliese Amschler Andrews

1. Introduction 2
2. Development Approaches for Embedded and Nonembedded Systems with Reuse 4
3. Review Process and Inclusion Criteria 9
4. Reuse and Development Approaches for Embedded versus Nonembedded Systems 11
5. Metrics Reported 19
6. Analysis of Outcomes 22
7. Threats to Validity 35
8. Conclusion and Future Work 38

Acknowledgments 40
Appendix A: Years of Publication 40
References 41
About the Authors 46

2. Advances in Behavior Modeling **49**

Ella Roubtsova

1. Introduction 50
2. Properties of the Modeling Semantics Needed for System Life Cycle Support 51
3. Events, States, Transitions, and Communication Composition 53
4. Behavior Semantics in UML 60
5. Outside UML 72
6. Summary of Semantic Elements of Behavior Modeling Approaches and Their Properties 100

Acknowledgments 106
References 106
About the Author 109

3. Overview of Computational Approaches for Inference of MicroRNA-Mediated and Gene Regulatory Networks **111**

Blagoj Ristevski

1. Introduction 112
2. Biological Backgrounds of Cell Regulatory Mechanisms and Experimental Technologies 114
3. Computational Backgrounds of the Inference of MiRNA-Mediated and GRNs 116
4. Models for GRNs Inference 118
5. Computational Approaches for Inference of MicroRNA-Mediated Regulatory Networks 131
6. Model Validation 137
7. Conclusion and Further Works 139

References 140

About the Author 144

4. Proving Programs Terminate Using Well-Founded Orderings, Ramsey's Theorem, and Matrices **147**

William Gasarch

1. Introduction 148
2. Notation and Definitions 149
3. A Proof Using the Order $(N, \leq)$ 152
4. A Proof Using the Ordering $(N \times N \times N \times N, <_{lex})$ 153
5. A General Theorem About Proving Programs Terminate Using Well-Founded Orderings 155
6. A Proof Using Ramsey's Theorem 156
7. A General Theorem About Proving Programs Terminate Using Ramsey Theorem 157
8. A Proof Using Matrices and Ramsey's Theorem 160
9. Another Proof Using Matrices and Ramsey's Theorem 165
10. A Proof Using Transition Invariants and Ramsey's Theorem 168
11. Another Proof Using Transition Invariants and Ramsey's Theorem 172
12. Solving Subcases of the Termination Problem 173
13. How Much Ramsey Theory Do We Need? 176
14. Open Problems 179
15. Summary 179

Acknowledgments 180

A. Using Just C_1 and C_2 to Prove Termination 180

B. A Verification That Needs the Full Ramsey Theory 181

C. Ramsey's Theorem 182
D. The Transitive Ramsey Theorem 194
References 197
About the Author 200

5. Advances in Testing JavaScript-Based Web Applications 201
Ali Mesbah

1. Introduction 202
2. Empirical Studies 204
3. Testing Techniques 208
4. Test Oracles 220
5. Test Adequacy Assessment 222
6. Handling Failures 226
7. Programmer Support 227
8. Concluding Remarks 229
