

1. Advances in Software Engineering and Software Assurance	1
D. Shoemaker, C. Woody, and N.R. Mead	
1. Introduction	4
2. Structured Programming: The Dawn of a New Era	6
3. Language Support for Structured Programming	8
4. Computing Meets Reality: The Protection of Information in Computers	11
5. Security Gets Serious: Societal Responses and the Morris Worm	16
6. Software as a Commodity and the Rise of the SE Best Practice Approach	21
7. The Rise of the Internet and the Advent of Formal Software and System Security Programs	26
8. Cybersecurity Becomes a Societal Issue: Legal Frameworks	30
9. Complexity and Supply Chains: The Need for Broad-Scale Integration	33
10. Where We Are Now	37
Acknowledgments	39
References	39
About the Authors	45
2. Privacy Challenges and Goals in mHealth Systems	47
F. Rahman, I.D. Addo, S.I. Ahamed, J.-J. Yang, and Q. Wang	
1. Introduction	48
2. Technologies Used in mHealth	51
3. Major Privacy Challenges	51
4. Significance of Privacy in mHealth	55
5. Solving Privacy Problems with Various Methods	56
6. Conclusion	59
References	59
About the Authors	61
3. A Survey of Data Cleansing Techniques for Cyber-Physical Critical Infrastructure Systems	63
M. Woodard, M. Wisely, and S. Sedigh Sarvestani	
1. Introduction	64
2. Running ITS Example	67

3. Data Cleansing Techniques	72
4. Classification of Techniques Based on Type of Anomaly	82
5. Classification of Techniques Based on Requirements and Constraints	89
6. Classification of Techniques Based on Type of Data	96
7. Classification of Techniques Based on Hierarchical Location	101
8. Conclusion	105
Glossary	105
References	106
About the Authors	109
4. Indexing and Querying Techniques for Moving Objects in Both Euclidean Space and Road Network	111
L. Heendaliya, M. Wisely, D. Lin, S. Sedigh Sarvestani, and A. Hurson	
1. Introduction	112
2. Ground Transportation System as CPS	115
3. Indexing MOs	120
4. Query Processing	138
5. Query Performance of Traffic Predicting Queries Under Road Network Constraints	151
6. Conclusion and Future Work	164
