

ADVANCES IN
APPLIED MICROBIOLOGY

VOLUME 110

AD/A
3

Contents

<i>Contributors</i>	vii
1. Detection of the 'Big Five' mold killers of humans: <i>Aspergillus</i>, <i>Fusarium</i>, <i>Lomentospora</i>, <i>Scedosporium</i> and <i>Mucormycetes</i>	1
Christopher R. Thornton	
1. Introduction	3
2. <i>Aspergillus</i> species pathogenic to humans	4
3. Detection of <i>Aspergillus</i> diseases	8
4. <i>Fusarium</i> species pathogenic to humans	22
5. <i>Pseudallescheria/Scedosporium</i> species complex and <i>Lomentospora prolificans</i>	27
6. Mucormycete species pathogenic to humans	32
7. Conclusions and future prospects	39
Acknowledgments	41
References	41
2. Bacteroidetes bacteria in the soil: Glycan acquisition, enzyme secretion, and gliding motility	63
Johan Larsbrink and Lauren Sara McKee	
1. Microbial life in the soil	64
2. The soil provides a rich diet of diverse complex carbohydrates	67
3. Protein secretion mechanisms among the Bacteroidetes	71
4. Bacterial mechanisms of carbohydrate degradation in the soil	75
5. The high energy cost of enzyme secretion: Strategies for maximizing return on investment	78
6. Future perspectives	86
Acknowledgments	87
References	87
3. Anaerobic and hydrogenogenic carbon monoxide-oxidizing prokaryotes: Versatile microbial conversion of a toxic gas into an available energy	99
Yuto Fukuyama, Masao Inoue, Kimiho Omae, Takashi Yoshida, and Yoshihiko Sako	
1. Introduction	100
2. Isolates of hydrogenogenic CO oxidizing prokaryotes	103

3. Energy conservation mechanisms of hydrogenogenic CO oxidizing prokaryotes	113
4. Response mechanisms to CO in hydrogenogenic CO metabolism	120
5. Phylogenetic diversity of Ni-CODH/ECH and distribution of its owner	122
6. Biotechnological application of hydrogenogenic CO oxidizers	131
7. Concluding remarks	134
Acknowledgments	135
References	135
4. The versatility of <i>Pseudomonas putida</i> in the rhizosphere environment	149
Lázaro Molina, Ana Segura, Estrella Duque, and Juan-Luis Ramos	
1. Introduction	150
2. <i>Pseudomonas putida</i> , a good rhizosphere colonizer	152
3. Chemotaxis of <i>Pseudomonas putida</i> toward rhizosphere	154
4. Biofilm formation	157
5. Metabolism of <i>Pseudomonas putida</i> in the rhizosphere	159
6. Plant growth promoting properties	164
7. Phytoremediation	165
Acknowledgments	172
References	172
Further reading	180
5. Glutathione: A powerful but rare cofactor among Actinobacteria	181
Anna C. Lienkamp, Thomas Heine, and Dirk Tischler	
1. Glutathione: An introduction	183
2. Actinobacteria and glutathione	192
3. Enzymes providing glutathione	199
4. Glutathione utilizing enzymes among Actinobacteria	202
5. Applied microbiology and biotechnology	206
6. Detoxification by means of glutathione	209
7. Conclusion	210
Acknowledgments	210
References	210
